

Maternal Composites

We are really pleased with our 2023 drop rams. With rigorous culling and great lambing percentages we believe our 2024 line up is our most consistent yet.

The Rams visually display plenty of thickness and fat which is backed up by their ASBV's, they are moderate framed and sound structured.

Maternal Composites & White Baldies

Three Breeds on offer in 2024

2024 has seen the launch of our new shedding breed "White Baldies".

We are excited to offer our first rams this year at our on-property sale Friday October 4th, 2024.

We believe they exhibit plenty of growth and carcase in a maternal shedding package. We look forward to your feedback on our lineup of rams.

Our 2024 white Suffolk rams are impressive. They are exhibiting plenty of growth and muscle, with structural soundness. Our ASBV's are again at the top of the breed. There are plenty of low birth weight, lambing ease options to compliment the strong growth and carcase ASBV's.

A highlight of our 2024 offering will be the first progeny of our new \$20,000 sire, Warburn 210303. They are certainly what the industry requires, exhibiting their fathers' outstanding carcase and growth. He is also in the top 5% of the breed for IMF and shear force.

Our other new sire this year is Farrer 200086, he is a lambing ease and IMF specialist. He has combined well with our flock to offer an exciting group of progeny. A

couple of our top end rams are sired by him.

Last years top seller Days 220266 who sold for \$22,000 to Harry's Well was used as a ram lamb and certainly bred very well and is in the top 5% on all indexes

Other Homebred Sires, 210167, 210155 and 210332 are well represented and offer different strengths while having the commonality of all having resilience being in the top 10% for low WEC.

Our Maternal Composite offering gets stronger every year, they are certainly worth considering if you are looking at options for a self-replacing flock. Our current clients are exceptionally pleased with their weaning rates, growth rates and carcase attributes.

Leading the charge is homebred sire 20M036. He is in the top 5% on the MCP+ index and is a standout for low mature weight relative to his post weaning weight. He is also in the top 5% for Eye muscle depth.

My number is 0428521630 and welcome a call anytime to talk about our programs and how they could benefit yours or to organise a time for a visit.

White Baldies

We decided to create our own shedding maternal composite sheep in response to industry conversations. We have trademarked the name "White Baldies". The name came about as a lot of the shedding breeds have the word white in their name and baldies because they are bald and to us the Black Baldy is the best maternal cow in Southern Australia.

We were keen to lock into our White Baldies the fertility, mothering ability, growth, carcase, low worm egg counts, and moderate ewe size that we have been working so hard on in our maternal composites. Hence the majority of our base ewes have come from our maternal composite flock. We have also utilized some white Suffolk genetics to add extra growth and carcase merit.

We chose White Dorper and Ultra white genetics on the sire side to introduce shedding genetics to our programme.

As with our seedstock livestock enterprises we are very data driven. We are measuring birth weight, weaning weights, post weaning weights at which time they are scanned for eye muscle depth and fat. We also collect mature weights on our ewes, individual worm egg counts, pregnancy scan data, birth type and rear type and measure maternal behaviour score at lambing.

At this stage our ASBV's are incomplete as we have combined genetics from various databases – Maternal Composite, Composite Shedders, Composite Terminal, and Terminal databases. In 12 months not only will our ASBV's be more complete but accompanying that will be an increase in accuracy, which makes them more reliable as a selection tool.

We look forward to your feedback. Always keen to have a chat about how these genetics may play a part in your flock. Please call Lachy on 0428 521 630 if you have any questions.
