The vendors and or their agents do not give any warranty as to errors or omissions, if any, in these particulars which they believe to be accurate when compiled. Prospective purchasers should satisfy themselves by inspection or otherwise as to the accuracy of the particulars.

## SALE INFORMATION

### **Inspection**

All cattle will be available for inspection from 2.00pm on the day of the Sale, however inspection can be arranged before hand by appointment.

### **Buyer's Registration**

The buyer's number system will be in operation, so all prospective purchasers will need to register prior to the sale.

### **Selling Order**

The vendor and selling agents reserve the right to alter the selling order

### **Insurance**

We recommend insurance, which can be arranged on the day. While all care will be taken with all Cattle prior to delivery, they become the purchaser's responsibility at the fall of the hammer.

### **Delivery**

Dick Smith Transport will co-ordinate all deliveries after the sale. They will work in conjunction with local and preferred carriers to deliver your cattle in the best possible way. Please communicate all your transport needs with them. The ownership of the cattle rests with the purchaser at the fall of the hammer. No deliveries of cattle will be occurring on sale day.

**Dick Smith Transport 0448 822 622**

### **Health**

All cattle are officially government confirmed as TB free and Brucellosis free. The properties have a J-Bas 6 status for Bovine Johnes disease. All sale cattle treated with 7 in 1 (booster due Autumn 2025). All sale cattle treated with Dectomax, January 2025. All sale cattle ear notch tested as NOT persistently infected with the BVDV virus.

### **Preg Testing**

All females pregnancy tested in calf

## WELCOME

Dear Fellow Breeder

What an opportunity. Never before have we given access to our herd on such a scale. Rarely and definitely not for a long time have the females from the heart of our programme become available.

We are excited to be able to offer our best proven cows to you. Increased embryo transfer programmes and good pregnancy test results over recent years mean we can offer this group of cows to you without impacting our ability to service our bull client's needs over the forthcoming years.

With heifers, second calvers and ET calves we anticipate we will record 180 registered Hereford calves in 2025.

We are offering all females born during and prior to 2021. These cows and their mothers produced the 2020 drop of bulls that set a new Australian Hereford record price bull sale average with 45 bulls selling to average \$19,933. There are mothers of herd sires used both at Days Whiteface and elsewhere as well as dams of countless numbers of bulls plying their trade from pastoral areas in NT, Western NSW, and southwestern QLD to the traditionally greener pastures of southern NSW, Victoria, and SE South Australia.

We have always strived to introduce the best genetics into our herd, be that locally or overseas, male or female. You will see many cow families that we have had since we started breeding registered cattle in 1949 as well as some more recent additions as we have taken the opportunity to introduce new families from herd dispersals.

The cows on offer are joined to a group of industry leading, phenotypically attractive high performance bulls. They are joined as if they were being retained in the herd.

We are really proud to offer you this group of females. They will be on display at our on property field day on Monday 10th February or can be inspected by appointment. Videos of the females will be available on our website. For any enquires please contact Lachy on 0428 521 630.

Be warned I could talk about these cows for hours!!

Lachy and Lou Day

**EBV's are provided for the following traits:**

- CE DIR** Calving Ease Direct. Indicates how this animal influences the birth of its progeny. Positive EBV's indicate easier calving.
- CE DTRS** Calving Ease Daughters. Indicates how well the animal produces daughters that have easier calving.
- GL** Lower Gestation Length EBV's indicate easier calving and increased growth after birth.
- SS** Scrotal size is an indicator of male fertility in regards to semen quality and quantity. SS is also positively associated with female fertility.
- Birth Weight** The lower the birthweight EBV, the lighter is the birthweight potential of the progeny.
- Genetic Milk** Reflects extra calf weight at weaning due to the genetic influence a sire has on his daughters milking and mothering ability.
- 200 Day Weight** Indicates the relative weight advantage of a sire at 8-10 months of age.
- 400 Day Weight** Indicates the relative weight advantage of a sire at yearling age.
- 600 Day Weight** The best single estimate of an animals genetic merit for growth beyond yearling age.
- MWT** Mature Cow Weight is an estimate of the genetic difference in cow weight at 5 years of age.
- CWT** Estimates the genetic difference in carcass weight and is adjusted to 650 days of age.
- Fat Depth** Bulls with negative (-) EBV's for this trait are expected to produce relatively leaner progeny than bulls with positive (+) EBV's.
- EMA** Bulls with positive (+) EBV's for this trait are expected to produce more muscular progeny than bulls with negative (-) EBV's.
- Retail Beef Yield** Bulls with larger EBV's are expected to produce progeny with higher yielding carcasses.
- Intramuscular Fat %** Positive EBV's indicate likelihood of more intramuscular fat.
- Accuracies** The accuracy provides a measure of the reliability of the EBV. The higher the value, the less likelihood of the EBV changing with the addition of more performance records on the animal.
- Selection Indexes** An index ranks an animal for single production goal - profit. They take the hard work out of knowing how much emphasis to give each of the available growth, maternal, carcass and fertility EBV's when selecting parent animals. An index is a composite EBV of traits best suited to a particular production system and target market.

**Sustainability Production Index (\$):** Estimates the genetic differences between animals in net profitability per cow joined in a commercial self-replacing Hereford herd targeting the domestic market and with a strong focus on sustainability. Daughters are retained for breeding, so maternal traits are of importance. Steers are finished on grass until 20 months of age to target 300 kg carcasses with 10 mm P8 fat depth.

**MSA Production Index (\$):** Estimates the genetic differences between animals in net profitability per cow joined in a commercial self-replacing herd targeting higher MSA grades in the domestic market. Daughters are retained for breeding and so maternal traits are of importance. Steers are grain finished until 20 of age to target 340 kg carcasses with 12 mm P8 fat depth. A high cost is applied for cow feed costs during the annual feed shortage period which produces little change in mature cow weight.

**AVERAGE EBVS FOR 2021 BORN CALVES**

Comments: We purchased Southern Cross in 2022 for a record Hereford Yearling bull price of \$91,000. He has been used extensively with great results really putting a type on his progeny. He has a unique data set being a trait leader for low birthweight and also 200, 400 & 600 day wt. He also has top 1% indexes, EMA and carcass weight. He is the joining sire for 23 lots.

Comments: A half share in Landlord T064 has been sold to Talbalba Herefords. Landlord's dam sells as lot 2. His Granddam Fancy H31 has been our most successful cow recently being dam of the Godfather bulls, 11 selling to \$52,000 to Yarram Park to average \$19,545. He has an outstanding EBV profile already being a trait leader for short gestation length, scrotal size and 200, 400 & 600day wt. He is also top 1% on both indexes. He is a joining sire on 12 lots.

Comments: We had to start the sale with a Fancy H31 daughter. Fancy N7 is a big, deep heavy donor who has bred very well. We have used one son Missouri S100 who sold for \$18,000 to The Snuggery. She has a daughter, lot 17 in the sale and four "T" daughters retained. 3 Maternal sisters sell as lots 2,3 & 4. Watch out for her 2024 calf, Missouri V075. Because of the success of her flush to TH Masterplan we joined her to our Masterplan son King Pin T168 from 31/7/24 to 10/10/24.

# Don't let pestivirus rob you blind

**Pestivirus is an insidious cattle disease. It can take from you before you know it.**

It causes significant reproductive and performance issues, and weakens immune systems – leading to other costly cattle health problems like respiratory disease. In fact it costs the industry over \$114m every year.<sup>[1]</sup>

To protect your herd from pestivirus and optimise your returns, it pays to be on Pestigard.

Find out how easy it is at your local rural reseller or cattle vet.
