Industry Leading Whiteface Genetics

Days Whiteface Dual Sales

2025 will see Days Whiteface conducting two sales. Our bull sale is at 12 noon Monday 24th February 2025. Preceding that we are holding a mature cow dispersal at 4pm on Sunday 23rd February.

Feature sire at this years bull sale is Tobruk Southern Cross S015. We will have 19 sons of Southern Cross on offer. We purchased Southern Cross for a record Hereford Yearling price of \$91,000. His performance data is incredible. He is trait leader for low birth weight and 200, 400 and 600 day weight which is very unique. He is also a trait leader for scrotal size and in the top 1% of the breed for EMA. New sire SHF Houston D287 H086 offers outcross genetics. Like Southern Cross he is a trait leader for 200, 400 and 600 day wt., scrotal size and in the top 1% for EMA.

With growing cow numbers, it is exciting to be able to offer a large group of proven breeders. See next page for more details.

DAYS FANCY H31

DAM OF LOTS 1, 2, 3 & 7 IN MATURE COW DISPERSAL

Days Whiteface Female Sale

What an opportunity. Never before have we given access to our herd on such a scale. Rarely and definitely not for a long time have the females from the heart of our programme become available.

We are excited to be able to offer our best proven cows to you. Increased embryo transfer programmes and good pregnancy test results over recent years mean we can offer this group of cows to you without impacting our ability to service our bull clients' needs over the forthcoming years.

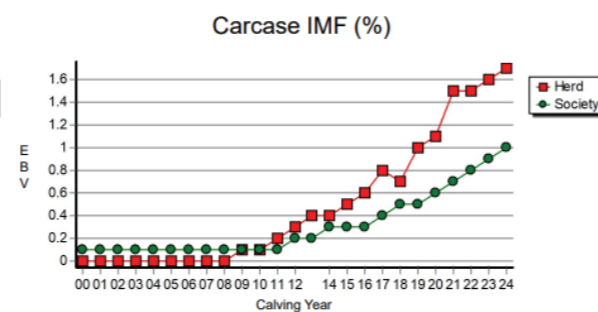

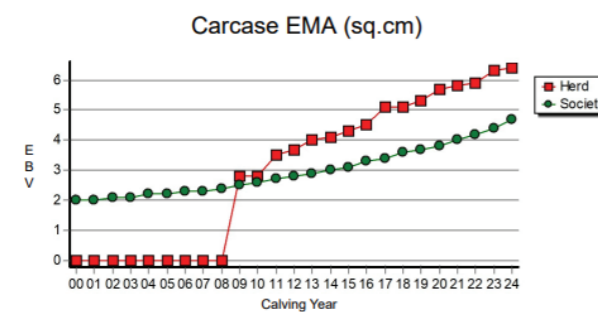

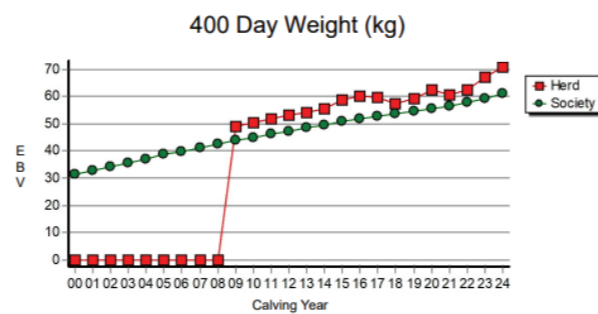

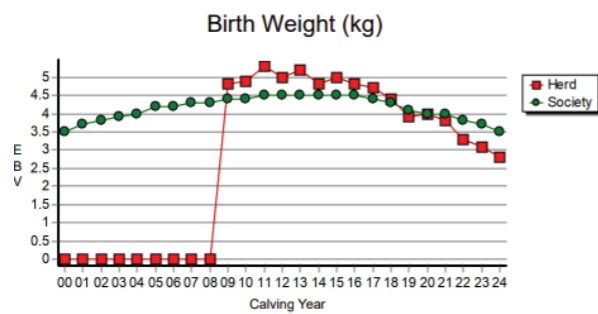

With heifers, second calvers and ET calves we anticipate we will record 180 registered Hereford calves in 2025.

We are offering all females born during and prior to 2021. These cows and their mothers produced the 2020 drop of bulls that set a new Australian Hereford record price bull sale average with 45 bulls selling to average \$19,933. There are mothers of herd sires used both at Days Whiteface and elsewhere as well as dams of countless numbers of bulls plying their trade from pastoral areas in NT, Western NSW, and southwestern QLD to the traditionally greener pastures of southern NSW, Victoria, and SE South Australia.

We have always strived to introduce the best genetics into our herd, be that locally or overseas, male or female. You will see many cow families that we have had since we started breeding registered cattle in 1949 as well as some more recent additions as we have taken the opportunity to introduce new families from herd dispersals.

The cows on offer are joined to a group of industry leading, phenotypically attractive high performance bulls. They are joined as if they were being retained in the herd.

Industry Leading Performance

If you are unable to make the sale this year, we are interfaced with AuctionsPlus.
